Dallas Police Department

GENERAL ORDER NO. 81

SUBJECT: Press Relations DATE: June 15, 1958

At most major police incidents, members of the Press, Radio Newscasters and Press Photographers, are found, covering the incident for the paper or other organization for which they work. These members of the Working Press have in their possession a press card identifying them and an official press card for their automobile.

It is the policy that members of this Department render every assistance, except such as obviously may seriously hinder or delay the proper functioning of the Department, to the accredited members of the official news-gathering agencies and this includes newspaper, television cameramen and news-reel photographers.

Amateur photographers and those without proper press credentials will be handled as other bystanders and will be given no more liberty at the scene of a police incident than others of the general public present. They will not be permitted to cross police lines nor approach closer to the scene than the general public is allowed.
